

CONNECT. COLLABORATE. CATALYZE RESEARCH.

## **Daymont, Carrie**

Bio: Carrie Daymont is a hospital pediatrician and clinical researcher. After finishing pediatrics residency at the Children's Hospital of Philadelphia, she practiced primary care pediatrics in West Philadelphia full-time for two years. She then completed an academic general pediatrics fellowship at CHOP along with a Master's of Science in Clinical Epidemiology. During that time she transitioned her clinical practice to inpatient pediatrics. Her husband's career brought her to Winnipeg, Manitoba in Canada, where she practiced as a hospital pediatrician, and did quality improvement work and clinical research for 6 years. Her desire to further her research career brought her and her husband back to the U.S., and she started at Penn State in Hershey in 2016. Her overall research interest is to improve the evidence base for how simple clinical measurements, particularly growth measurements and vital signs, should be used in clinical decisions.
