

## **Jaffray, Julie**

Julie Jaffray is an Assistant Professor of Clinical Pediatric at Children's Hospital, Los Angeles (CHLA). She undertook her pediatric residency at the University of Massachusetts Medical Center, and she completed her pediatric hematology/oncology fellowship at the combined Memorial Sloan Kettering Cancer Center/New York Presbyterian Hospital Weill Cornell program in New York. In July 2013, Dr. Jaffray spent an additional two years undertaking an advanced fellowship in pediatric hemostasis and thrombosis at CHLA.

Dr. Jaffray's clinical and research interests are in the epidemiology and prevention of pediatric thrombosis. She received intramural funding for her work on hospital acquired venous thrombosis prevention as well as acceptance into the ASH Clinical Research Institute in 2016. She is also one of the national leaders for venous thrombosis prevention through The Children's Hospitals Solutions for Patient Safety. Dr. Jaffray is also passionate about improving the care for girls and women with bleeding disorders. She helped develop a clinic at CHLA dedicated to these patients and is currently running small conferences for pediatricians in the Los Angeles area provide education on girls and women with bleeding disorders.
