

CONNECT. COLLABORATE. CATALYZE RESEARCH.

Mezu-Ndubuisi, Olachi

Dr. Olachi Mezu-Ndubuisi is a neonatologist and an Assistant Professor of Pediatrics and Ophthalmology at University of Wisconsin, Madison with a research interest in Retinopathy of Prematurity (ROP), who innovatively uses *in vivo* retinal imaging techniques to study vascular, structural and functional changes in ROP, as well as investigates potential therapies and mechanism of action. She also has a clinical interest in neurodevelopmental outcomes of prematurity and a passion for international global health activities.
