

## **Rollins, Caitlin**

Caitlin K. Rollins is an attending physician in behavioral neurology at Boston Children's Hospital. She received her undergraduate degree from Harvard University and medical degree from the University of Pennsylvania. She completed pediatrics training at Children's Hospital of Philadelphia, followed by residency in child neurology and fellowship in behavioral neurology at Boston Children's Hospital. Dr. Rollins' clinical work and clinical research focuses on children with congenital heart disease. She is the primary neurologist for the Cardiac Neurodevelopmental Program at Boston Children's Hospital, treating issues such as developmental delay, attention deficit hyperactivity disorder, and learning disabilities. Her research focuses on elucidating the neurobiological underpinnings of neurodevelopmental impairment in children with congenital heart disease. She has evaluated the relationship between quantitative brain MRI measures and neurodevelopment in children and adolescents with congenital heart disease. Her current research harnesses advances in fetal MRI to characterize prenatal influences on brain development in congenital heart disease. Dr. Rollins is a member of the Cardiac Neurodevelopmental Outcomes Collaborative and has received several awards for her work including the American Academy of Neurology Clinical Research Training Fellowship, the Pediatric Heart Network Scholars Award, the Eleanor and Miles Shore Fellowship, and the NARSAD Young Investigator Award. She is currently supported by a Career Development Award from the National Institutes of Neurological Disorders and Stroke of the National Institutes of Health.
