

## **Scott, Daryl**

Dr. Scott received his undergraduate training at Brigham Young University. After graduation, he was accepted to the Medical Scientist Training Program at the University of Iowa. There he completed his MD training and also graduated with a PhD degree in genetics. He then moved to the University of Utah where he did a residency in Pediatrics and then to Baylor College of Medicine where he did a second residency in Clinical Genetics. He is currently a board certified in both specialties.

After completing his residency training, Dr. Scott joined the Department of Molecular and Human Genetics at Baylor College of Medicine. He is currently an Associate Professor with tenure. He runs a research laboratory dedicated to identifying the genetic causes of common birth defects with specific emphasis on congenital diaphragmatic hernia and congenital heart defects. As a clinical geneticist, he cares for children with a variety of genetic disorders and collaborates with physicians and scientist from around the world to identify novel disease genes. He is also actively engaged in the training of medical students, residents, fellows and graduate students.
