Comment: The SPR is an essential organization to support and develop pediatric researchers at all stages of their careers. The discoveries and innovations developed by our members are essential in improving child health throughout the world. I believe communication and collaboration are essential to the success of any program. I will strive as the Director of Membership to create an environment that listens to and engages the membership to provide the best opportunities for their success. Through our engagement efforts, we will recruit the best pediatric-scientists of all types resulting in the continued diverse, strong membership we have today.
