

Mahant, Sanjay

Sanjay Mahant is a Staff Pediatrician and Associate Professor in the Division of Paediatric Medicine, Department of Paediatrics, University of Toronto and Associate Scientist, Research Institute at the Hospital for Sick Children in Toronto, Canada. He is also a faculty member at the Institute for Health Policy, Management and Evaluation, University of Toronto. Sanjay's clinical and research focus is on inpatient pediatric care. Broadly, Sanjay's research program centres on outcomes research in childhood hospital care: (1) Comparative effectiveness research around highly prevalent, and cumulatively costly conditions. He is currently the principal investigator on a Canadian Institutes of Health Research (CIHR) funded multi-centre trial comparing oxygen monitoring strategies for hospitalized children with bronchiolitis (2) The perspective of the patient and shared decision-making. He has conducted research around tube feeding decision-making in children with medical complexity. (3) Healthcare systems performance in childhood hospital care. For example, Sanjay has studied how the quality of care varies across hospitals around tonsillectomy care.

Sanjay is the Associate Program Director for the Academic General Pediatrics Fellowship at the Hospital for Sick Children in Toronto, Canada. He is also involved in the development and advancement of research networks within the field of general paediatrics and hospital medicine. Mahant is an executive council member for the Pediatric Research in Inpatient Network PRIS. He is also leading the development of a Canadian Pediatric Medicine inpatient research network focusing on highly prevalent, cumulatively expensive conditions. Sanjay is on the editorial board of The Journal of Pediatrics. He has previously served as the President of the Hospital Pediatrics Section, Canadian Pediatrics Society.
