

CONNECT. COLLABORATE. CATALYZE RESEARCH.

Peyvandi, Shabnam

Dr. Shabnam Peyvandi is an Assistant Professor of Pediatrics at the University of California San Francisco Benioff Children's Hospital. She is a pediatric cardiologist that specializes in fetal diagnosis and management of congenital heart disease. Her main research interest is identifying fetal markers of neurodevelopmental outcomes in fetuses with critical CHD. She was recently awarded a NIH/NINDS K23 award to study fetal cerebral regulation and oxygenation in the setting of CHD. She has also developed and directs a longitudinal neurodevelopmental follow-up program (Healthy Hearts and Minds Program) as part of the Pediatric Heart Center at UCSF.
