

Gibson, Keisha

Keisha L. Gibson MD, MPH Dr. Keisha Gibson received a BS Degree in Molecular Biology from Winston-Salem State University in 1997 and in 2002 received her MD degree from the University of NC at Chapel Hill. She then completed training for General Pediatrics at the Medical University of SC in 2005 before returning to UNC Chapel Hill to complete subspecialty training in Pediatric Nephrology and a MPH in Epidemiology in 2008. Since then, Dr. Gibson has worked as a full-time faculty member in the Division of Nephrology and Hypertension at UNC Chapel Hill. While her clinical focus is on the care of children, adolescents, and young adults with kidney disease, Dr. Gibson is a co-investigator on several multicenter research studies surrounding glomerular diseases such as Focal Segmental Glomerulosclerosis and lupus nephritis. In 2011, Dr. Gibson assumed the role of the UNC Pediatric Nephrology Fellowship Program Director and is currently the Chief of Pediatric Nephrology. On a national level, she is helping to lead efforts with the American Society of Nephrology to improve the nephrology profession through initiatives to improve diversity and inclusiveness and on a community level remains dedicated to supporting community pipeline programs that expose youth to careers in math and science.
