

Merianos, Ashley

Ashley L. Merianos, PhD, CHES, TTS is an Assistant Professor in the School of Human Services at the University of Cincinnati. Her research expertise and interest areas include substance use prevention and control, health services research, social and behavioral epidemiology, and quantitative statistical methods.

Dr. Merianos is a proud recipient of a National Institutes of Health/National Institute on Drug Abuse Mentored Research Scientist Development Award (K01DA044313). Her long-term research objective is to bring feasible and efficacious health promotion and disease prevention efforts to healthcare settings to reduce the overall health and economic burden substance use disorders place on children and their families.

To date, Dr. Merianos has published over 90 peer-reviewed publications in scholarly journals and has disseminated her research findings in over 75 international/national presentations. She currently serves as a member of the following professional organizations: National Institutes of Health Early Career Reviewer Program; American Academy of Pediatrics Tobacco Consortium; and the American Journal of Health Behavior review board. Dr. Merianos received the University of Cincinnati Health Research Rising Star Award in 2016, which is given to a person who is active in health-related research and who will be the future of the university's research prowess.
