

### **Staber, Janice**

Janice Staber, MD is an Assistant Professor of Pediatrics in the Division of Hematology/Oncology/BMT at the University of Iowa. She earned her medical degree from the University of Iowa, Carver College of Medicine. Dr. Staber completed her pediatric residency and pediatric hematology/oncology training at the University of Iowa Stead Family Children's Hospital. The long-term goal of Dr. Staber's work is to improve treatment options for patients with hemophilia and other heritable bleeding disorders. To this end, Dr. Staber focuses on two objectives. First, her research centers on understanding the impact and mechanism of von Willebrand factor on inhibitor development in factor VIII deficiency. Second, her research aims to understand the impact of factor VIII deficiency on brain structure and function as well as determine the mechanism behind these changes. Dr. Staber is a National Hemophilia Foundation Career Development Awardee (2016-2019). Additionally, she has been funded by the American Society of Hematology (ASH), the Bayer Hemophilia Early Career Investigator Award, the Molecular and Cellular Research To Advance Child Health, and UI Children's Hospital Children's Miracle Network. Clinically, she is a member of the Iowa Hemophilia and Thrombosis Center.
