

Vesoulis, Zachary

Dr. Vesoulis received his undergraduate degree from Miami University in Oxford, Ohio and completed his medical training at The Ohio State University in Columbus, Ohio. Dr. Vesoulis then completed an accelerated Pediatrics Residency and Neonatal-Perinatal Medicine fellowship at St. Louis Children's Hospital and Washington University through the Special Alternative Pathway. He developed his research interest in neonatal neuroscience under the mentorship of Drs. Terrie Inder, Jeff Neil, and Lianne Woodward. His current research focus is the role of cerebrovascular autoregulatory dysfunction in the development of brain injury in preterm and term infants.
