

Vyas-Read, Shilpa

Shilpa Vyas-Read is an Assistant Professor in the Division of Neonatal-Perinatal Medicine at Emory University. Dr. Vyas-Read's research focuses on understanding the clinical and translational predictors of and outcomes for premature infants with pulmonary hypertension secondary to bronchopulmonary dysplasia. She has a background in basic science research, and had spent the early part of her academic career trying to determine the effect of oxidative stress on the alveolar epithelium and the developing lung. Dr. Vyas-Read also enjoys being a neonatologist in a bustling academic medical center in Atlanta, and she enjoys mentoring fellows in the Division. Dr. Vyas-Read completed her medical training at University of Alabama at Birmingham, her residency training at Northwestern University, and her fellowship training at University of Texas Southwestern. Most recently, she completed her Master of Science in Clinical Research at Emory University. When Dr. Vyas-Read is not busy professionally, she enjoys watching her daughters play soccer and run track at their school.
