

de St. Maurice, Annabelle

Dr. de St. Maurice is an Assistant Professor of Pediatrics in the Division of Infectious Diseases and leads the Pediatric Infection Control and Antibiotic Stewardship Programs at UCLA. She obtained her medical degree at the University of Rochester and completed her Pediatrics residency at Children's Hospital of Pittsburgh of UPMC. After residency, Dr. de St. Maurice went to Vanderbilt University where she completed a pediatric infectious disease fellowship and earned a Masters in Public Health. She then joined the Epidemic Intelligence Service (EIS) and went to the Viral Special Pathogens Branch at the Centers for Disease Control and Prevention. Her research and clinical interests are focused on studying the epidemiology of infectious diseases and mitigating the spread of emerging infectious diseases. She has studied the impact of pneumococcal vaccine on invasive pneumococcal disease rates, risk factors for hantavirus pulmonary syndrome, epidemiology of Rift Valley fever disease, and sequelae of Ebola disease in survivors. In her current role, Dr. de St. Maurice works to prevent the spread of infections and multi-drug resistant organisms in the hospital setting.
