

RWJBarnabas Health and Rutgers-Robert Wood Johnson Medical School is Seeking a Pediatric Pulmonologist in New Brunswick, NJ!

The Department of Pediatrics at Rutgers Robert Wood Johnson Medical School seeks a dynamic career-oriented physician to join the faculty of the Division of Pulmonary Medicine and Cystic Fibrosis Center. Candidates who have successfully completed a fellowship and are board certified/board eligible in Pediatric Pulmonology will be considered. The division has a comprehensive Cystic Fibrosis Center (pediatric and adult), a comprehensive sleep disorders program, technology dependent center, aero digestive, asthma and general pulmonary clinics. The position will have both clinical and academic responsibilities. In support of our academic endeavors, we have a state of the art Pediatric Clinical Research Center, we have an active CFF TDN Center and Rutgers RBHS has a Clinical and Translational Science Award.

Responsibilities:

- Candidate will develop a strong clinical and teaching base for medical students, residents and fellows.
- Candidates expected to develop research projects. Startup grant funding is available for qualified applicants.

Qualifications:

- Candidates must be a graduate of an accredited medical school program including formal specialty training in Pediatric Pulmonology.
- Candidates must be board certified in Pediatrics with board eligibility in pulmonary medicine and/or sleep medicine.
- Candidates expected to provide ambulatory and inpatient care including bronchoscopies.
- Training in Sleep medicine is an asset.

Both new fellows and experienced physicians are encouraged to apply!

About Rutgers University Robert Wood Johnson Medical School:

The Department of Pediatrics is composed of 124 full-time and more than 200 volunteer faculty members, organized into 18 divisions covering all of the pediatric subspecialties in conjunction with four key surgical services. The department is undergoing a renaissance following the integration of the medical school with Rutgers, The State University of New Jersey, and the recent merger of two major health systems to form RWJ Barnabas. The department has already recruited 43 new faculty members with plans for hiring additional faculty, allowing us to expand our research and clinical programs and provide improved care to our patients. Our educational mission focuses on the development of the next generation of multi-talented physicians who will become leaders in education, research and patient care. Our ACGME-accredited training programs continue to thrive and expand.

The outpatient services are located in the Rutgers Child Health Institute of NJ, a state of the art facility that includes a Pediatric CRC, Pediatric subspecialty offices, and a modern research facility. Our New Brunswick-based clinical programs have achieved Accredited Status for Ambulatory Health Care by the Joint Commission, one of only a small number of academic ambulatory practices with this status. The inpatient clinical services of the division of Pediatric Gastroenterology and Nutrition are conducted at the Bristol-Myers Squibb Children's Hospital (BMSCH) of the Robert Wood Johnson Barnabas Hospital in New Brunswick, NJ. This is a 105-bed acute care hospital for children with a dedicated endoscopy suite located on the only

pediatric academic health campus in the state of New Jersey. The BMSCH is ranked as one of America's Best Hospitals by U.S. News and World Report. Adjacent to the RWJ Barnabas Bristol-Myers Squibb Children's hospital is the PSE&G Children's Specialized Hospital, which is one of the country's largest inpatient acute rehabilitation facilities for children. Across the street is the Rutgers Cancer Institute of NJ – the only NCI designated center in the state of New Jersey.

The Robert Wood Johnson School of Medicine is consistently ranked as one of the highly NIH-funded academic universities and Rutgers is a member of the Association of American Universities comprising the top comprehensive research universities in North America. As the state's premiere institution, located in central New Jersey, there are many opportunities to collaborate across campuses with all the health professional schools and biomedical science schools at the Rutgers University.

Central New Jersey is a family friendly location offering urban and suburban life-styles within one hour of NYC, Philadelphia and the Jersey shore, as well as Rutgers Big Ten athletics and cultural events.

Interested candidates should email a cover letter and your CV to:

Thomas Scanlin, MD

Professor of Pediatrics, Department of Pediatrics

Chief, Division of Pediatric Pulmonary Medicine and Cystic Fibrosis Center

scanlitf@rwjms.rutgers.edu
