

# Discover Your Career at Emory University

Emory University is a leading research university that fosters excellence and attracts world-class talent to innovate today and prepare leaders for the future. We welcome candidates who can contribute to the diversity and excellence of our academic community.

## Description

### Overview

Emory University is a leading research university that fosters excellence and attracts world-class talent to innovate today and prepare leaders for the future. We welcome candidates who can contribute to the diversity and excellence of our academic community.

### Description

The Center for Childhood Infections and Vaccines (CCIV), a joint entity within Emory Department of Pediatrics and Children's Healthcare of Atlanta (Children's), invites applications for a tenure eligible position at all faculty ranks, in the broad area of pediatric immunology and infectious diseases (MD, DO, and/or PhD required).

The faculty appointment will be primarily in the Department of Pediatrics within the Emory University School of Medicine. We offer a highly interactive collegial research environment with state-of-the-art facilities, as well as proximity to and collaborations with the Emory Vaccine Center, Emory Lowance Center for Immunology, the Emory National Primate Research Center, the Centers for Disease Control and Prevention, and the Georgia Institute of Technology. Clinical trial networks, including the Vaccine Treatment and Evaluation Unit (VTEU) and IMPAACT, operate within the Department of Pediatrics.

Areas of particular interest relate to immune ontogeny, immune responses at the maternal-fetal interface, vaccinology and vaccine delivery. We particularly seek researchers that incorporate precision medicine, big data, and/or artificial intelligence approaches into their investigations. The candidate will be expected to bring an innovative, externally funded research program, as well as engage in cross-disciplinary initiatives. For candidates with an MD or DO, clinical service opportunities may be available in pediatric infectious diseases or other clinical divisions as appropriate.

Interested applicants should complete the online application, and attach their CV, research and diversity statements, as well as the names of 3 references. Inquiries can be sent to Dr. Ann Chahroudi at [ann.m.chahroudi@emory.edu](mailto:ann.m.chahroudi@emory.edu).

---

Children's Healthcare of Atlanta and Emory University have worked together since 1956, facilitating leading-edge pediatric research, training and innovation. Together, our partnership advances research and facilitates evidence-based quality care for children. The Emory Department of Pediatrics continues to be ranked in the top five pediatric departments in National Institutes of Health research funding. This job opportunity is part of our ambitious \$200M investment to substantially grow our team of world-class child health researchers.
