

**Society for Pediatric Research
Strategic Plan - 2024-2028**

Vision	Promoting child health through a flourishing community of diverse researchers at the forefront of scientific discovery				
Mission	To cultivate a diverse network of child health researchers through collaboration, community, mentorship, and advocacy				
Domain	Research Excellence	Collaboration and Networking	Scientific Career Development	Advocacy and Policy Influence	Fiscal Sustainability and Strategic Growth
Goal	To foster a culture of scientific rigor and integrity	To facilitate cross-disciplinary connections and knowledge sharing	To provide resources, opportunities and support for child health scientists across the career spectrum	To actively advocate for the power of science to positively impact child health	To ensure the sustainability and growth of the society's initiatives
Strategic Objectives	Promote excellence, innovation and equity in research led by SPR members to showcase the breadth of scientific expertise within the society	Enhance mentorship, sponsorship, collaboration, and networking within and across broad research disciplines	Increase support for emerging child health researchers, with a focus on those from underrepresented backgrounds and those from resource-limited institutions	Advocate for increased, equitable, and sustainable resources for child health research nationally	Grow and diversify SPR sources of revenue to expand programs and resources to support members
	Maximize scientific rigor, breadth, and value of research presented at PAS across the research spectrum	Increase opportunities for researchers to interact outside their own research discipline or society	Promote the development of the next generation of scientific leaders	Advocate at local and national levels to mitigate the unique challenges facing pediatric physician-scientists	Align fiscal spending with strategic priorities
	Expand resources available to SPR members to accelerate innovative research	Foster international collaboration to advance pediatric research globally.	Develop and identify accessible tools and resources focused on professional development across the career spectrum of the child health scientist	Increase opportunities for SPR members to engage in advocacy to support child health	Broadly promote and showcase benefits of SPR membership across institutions engaged in child health research
