

**Medical Director, Craniofacial Genetics Program  
University of Washington School of Medicine  
Seattle Children's Hospital**

On behalf of the **Division of Craniofacial Medicine** in the Department of Pediatrics at the University of Washington School of Medicine (UWSOM) and Seattle Children's Hospital (SCH), CareerPhysician, LLC, the national leader in executive search and leadership development in Academic Child Health, is pleased to announce a national search initiated to identify candidates for the **Medical Director of the Craniofacial Genetics Program** at the rank of Clinical Assistant, Clinical Associate or Clinical Professor to provide both craniofacial pediatric and clinical genetic services.

The Craniofacial Center at Seattle Children's Hospital specializes in the treatment of cleft lip and palate, Robin sequence, craniosynostosis, craniofacial microsomia, and many other rare and complex craniofacial conditions. The center has become one of the most comprehensive craniofacial centers in North America with a multidisciplinary craniofacial team of over 50 healthcare providers and staff from 14 specialty areas that provide all aspects of care for children with craniofacial conditions.

**Opportunity Highlights:**

- This unique opportunity includes the leadership of a genetics program focused on the diagnosis and management of children with craniofacial conditions in both inpatient & outpatient environments.
- The most comprehensive 22q program providing care for children with craniofacial conditions in the United States.
- Opportunity for involvement with the SCH Partners in African Cleft Training (PACT), an international cleft lip and palate training program to improve and expand access to cleft lip and palate care in sub-Saharan Africa. Partnering in step with multiple disciplines provides a rich academic and clinical experience that is supported by large catchment areas/patient population with a broad array of diagnoses.
- Affiliation with internationally renowned pediatric and adult medical genetics center.
- Seattle Children's Research Institute is the 4<sup>th</sup> highest NIH-funded children's hospital Research Program nationally.
- Recognized as one of the nation's best children's hospitals and the top ranked pediatric facility in the Northwest, Seattle Children's Hospital is a 334-bed facility that offers over 60 pediatric subspecialties and is the pediatric and adolescent academic medical center for Washington, Wyoming, Alaska, Montana, and Idaho.
- Seattle is located on Puget Sound and is a family-oriented community in the heart of the Pacific Northwest. Ranked in the top 15 Best Places to Live, the mild winters and

temperate summers enable year-round outdoor activities.

**Qualifications**

The successful candidate must have an MD, or DO, or MD/PhD combined (or foreign equivalent), be board eligible or board certified in Pediatrics and Genetics and must be eligible for medical licensure in the state of Washington.

To schedule a call to discuss the role in greater detail, or if you would like to recommend an individual(s) who exemplifies the qualities we are seeking in a candidate, please contact Marcel Barbey, Vice President, CareerPhysician, LLC, c/o Jennifer Weimer at [jennifer@careerphysician.com](mailto:jennifer@careerphysician.com). All interactions will remain confidential, and no inquiries will be made without the consent of the applicant.

***UWSOM is an AA/EOE/ADA employer that values diversity and inclusion and is committed to building and sustaining an academic community in which teachers, researchers, and learners achieve the knowledge, skills, and attitudes that value and embrace inclusiveness, equity, and awareness to unleash creativity and innovation.***
