The Division of Allergy, Immunology, and Rheumatology within the Department of Pediatrics at the University of Wisconsin School of Medicine and Public Health is seeking an academic Pediatric Allergist, Immunologist, or Rheumatologist to assume the role of Division Chief.

We seek a leader with enthusiasm for academic medicine who will encourage, inspire, and empower division members. The Division Chief provides strategic and operational leadership; oversees divisional faculty and staff; spearheads the expansion of clinical, education, and research programs; and guides faculty professional development. This is an opportunity for a full-time Professor, Associate Professor, or late-stage Assistant Professor.

The Division of Allergy, Immunology, and Rheumatology provides state-of-the-art care to children with immune-mediated disorders. Our providers specialize in asthma, autoimmune and other rheumatologic diseases, and all types of allergies, from minor seasonal allergies to life-threatening allergies to foods, insects, or drugs. Clinicians work with families to better understand our patients' conditions and develop treatment plans. Our experts are committed to understanding the causes of these diseases and using this information to prevent and develop better treatments. We envision a circular pipeline of discovery from the bedside to the laboratory and back to the clinic.

The Department of Pediatrics is a vibrant academic department comprising more than 230 faculty members in 16 subspecialty divisions. The department promotes and enhances the health of children through outstanding clinical care, exemplary education of pediatric trainees, performance of cutting-edge research, and vigorous advocacy.

The University of Wisconsin–Madison is an Equal Opportunity educator and employer.
